DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hobbs (US patent no. 5,961,193). Hobbs discloses a spring loaded mounting mechanism connected to a housing (56), comprising: a spring actuated arm member (66); and a shaft (64) connected to the housing and coupled to the spring actuated arm member (at 76). Regarding claim 2, Hobbs discloses a spring actuated mounting mechanism connected to a housing comprising: means for actuating (spring 62) a radial member (pin 64); and means for adjusting the distance (handle 66, 80) between the radial member and the housing.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining art of record relates to speaker mountings with spring loaded mechanism.
